Bug Reports

Bug #1: Very Long Email Addresses Accepted Without Validation

Field	Value
Bug ID	BUG-001
Test Case ID	TC06 - Very long email should fail
Description	The contact form doesn't validate the length of email addresses. This could lead to potential database issues and violates the assumed requirements for proper email validation.
Expected Result	Form should display an error message indicating email is too long
Actual Result	Form accepts the submission without displaying any error message
Steps to Reproduce	1. Navigate to Contact Us page 2. Enter a very long email address 3. Submit the form 4. Observe the error message section
Severity	Medium
Priority	High

Bug #2: Special Characters Accepted in Order Reference

Field	Value
Bug ID	BUG-002
Test Case ID	TC08 - Order reference with special characters should fail
Description	According to requirements, the order reference field should only accept alphanumeric characters. However, the form currently allows special characters like "@", "#", "!" which could lead to data integrity issues.
Expected Result	Form should display an error message about invalid order reference format
Actual Result	Form accepts the submission without displaying any error message
Steps to Reproduce	1. Enter ORD@#! as order reference 2. Submit form 3. Observe response
Severity	Low
Priority	Medium

Bug #3: Extremely Long Order References Accepted

Field	Value
Bug ID	BUG-003
Test Case ID	TC09 - Very long order reference should fail
Description	The form accepts order references exceeding the maximum length (30 characters per requirements) without any validation, which could lead to database issues and potential security vulnerabilities.
Expected Result	Form should display an error message indicating the order reference is too long
Actual Result	Form accepts the submission without displaying any error message

Steps to Reproduce	1. Enter a long alphanumeric string in order reference 2. Submit form
Severity	Low
Priority	Medium

Bug #4: Large Files Accepted for Upload

Field	Value
Bug ID	BUG-004
Test Case ID	TC11 - File too large should fail
Description	The file upload functionality doesn't enforce the 5MB size limit as specified in the requirements. This could lead to server storage issues and potential denial of service.
Expected Result	Form should display an error message indicating the file is too large
Actual Result	Form Accepts large file
Steps to Reproduce	1. Upload a file larger than the allowed size 2. Submit form
Severity	High
Priority	High

1. Search Page

2.1 Detailed Test Cases

Test Cases	Total	Passed	Failed
Search Tests	1	0	1

ID	Test Description	Expected Result	Actual Result	Status
TC020	Search for dress products	All returned products should be "dress"	Only 5 products were returned instead of the expected 7	Fail

2.2 Bug Report

Bug #5: Search Results Don't Match Expected Count for "Dress"

Field	Value
Bug ID	BUG-005
Test Case ID	search Test - search for a dress
Description	When searching for the term "dress", the application returns 7 products but only 5 of these products are dresses. The remaining 2 products do not contain "dress".
Expected Result	All products returned in search results should be dresses or contain "dress" in their description
Actual Result	Out of 7 products returned, only 5 are dresses or contain "dress" in their name/description
Steps to Reproduce	1. Perform a product search with keyword "dress" 2. Count results 3. Compare against expected

Severity	Low
Priority	Low
